DGT GTD Changelog

Written by dgtale
Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

Upcoming features:

- Beta version (brand new app, refactored UI, Tablet support, customizations, ...)

May 3rd, 2013: The Beta version implementation is started and ongoing; because of that, new features implementation in the Alpha version is slowing down.

alpha 0.1.1 (06 Dec 2014)

- Fix: Reminders dialog opens the app in the background (reported by Robert)
- When DGT GTD is stopped by the user, by a task killer app or by the advanced power saver options, all scheduled alarms are cancelled. Workaround: re-schedule the alarms at next app start

alpha 0.1.0 (23 Nov 2014)

- (only for Toodledo users) Archived folders are now hidden in the Folders list. Changing the Folders visibility in DGT GTD implies the archiving in Toodledo
- Fix: Due date is not set creating a new task from "Today" tasklist
- Fix: Start date of recurring events from completion date (reported by Isaac)

alpha 0.0.99 (24 Jul 2014)

- Fix backup failure on KitKat devices: backups are now forced to store files in the internal storage due to   sdcard support changes in KitKat ; backups on external SDCARD are still supported on devices with JB or lower versions.

- Other storage improvements
- Preparation for exporting data to the beta version

alpha 0.0.98 (16 Jul 2014)

- Fix: Hyperlinks are underlined but don't react when clicked
- Fix: it might crash when sharing from other apps
- New notification message in case of backup crash; users can decide to submit the crash report by email contributing in improving the backup process

alpha 0.0.97 (12 Jul 2014)

- Remember "Today" checkbox flag in Quick-add widget
- "Today" checkbox flag in Quick-add now sets the time to "00:00" (it was "12:00")
- Avoid empty task title when sharing contents with DGT GTD
- Automatic old backup file purging enabled by default
- fix Background sync to Toodledo or backup to Dropbox crash on JB or higher Android versions

alpha 0.0.96 (04 May 2014)

- Quick-add dialog has a new checkbox: "Due today"
- Fix: Quick-add dialog max lines set to avoid layout misbehaviors (long text can be scrolled)
- Translation updates

alpha 0.0.95 (04 Apr 2014)

- Bug fix: force close on some devices by clicking "No Folder" and other lists
- Small improvement for "Note to self"

alpha 0.0.94 (1 Mar 2014)

- Showing task priority color in the reminder dialog
- Google Now support (Note To Self)
- Fix: Missed calls tasks are not created on some device under Android KitKat 4.4

Written by dgtale

Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

- Fix: Send intent from Llama/Tasker action when filter has no match

alpha 0.0.93 (16 Feb 2014)

- Added "Today" task list
- evernote:// links are now supported
- yinxiang.com shared links for Chinese version of Evernote are now supported

alpha 0.0.92 (03 Jan 2014)

- Clicking on a project or checklist in Pure Widget, DGT GTD starts showing its subtasks
- Notebook filter criteria: min. 2 characters required changed from 3 to 2

alpha 0.0.91 (10 Nov 2013)

- New: Connect notes with Evernote: tap the evernote link in a DGT GTD task and open the note in Evernote android app instead of the browser
- New: When holding the "+" button in the quick add dialog, the task is created and opened in the edit dialog
- Fix: Start date wrongly set in new occurrence of repeated task when advanced repeat option is set (eg: The X D every M, Every W, Last day...)
- Fix: Checklists show regardless of the filter (when "Hide until" is enabled)
- Fix: recurring checklist/project doesn't copy subtasks when completed from the "Completion" confirmation dialog
- Fix: "may contain uncompleted tasks" message by completing projects even tough all subtasks are completed

alpha 0.0.90 (05 Oct 2013)

- New option: Settings > Task settings > **Remove "Next Action"**.
  By default it's disabled in order to revert back the change implemented in 0.0.88 about the "Next Action" removal from new created recurring tasks.

DGT GTD Changelog

Written by dgtale
Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

alpha 0.0.89 (29 Sep 2013)

- Slightly increased the clickable area of the check box in the task list
- Fix: Items of recurring checklists are not copied
- Fix: Crash opening Notebooks

alpha 0.0.88 (08 Sep 2013)

- Confirmation dialog on restore
- Clear the "Next Action" status of the newly created occurrence of a repeating task
- Added preference option for Checklist items automatic deletion
- Fix: floating green dot and space in widget are messed up when scrolling
- Fix: bug with hierarchy on recurring projects
- Fix: complete on toodledo.com a task for which a reminder has already been triggered on the phone, the notification isn't removed after synching
- Fix: "Switch service" button is disabled unless you install the Toodledo plugin
- Fix: by completing a checklist which contains only completed items, it shouldn't display the warning message "...may contain unchecked items"
- Fix rare FC by changing automatic purge options

alpha 0.0.87 (13 Aug 2013)

- Backup purging option moved from Preference screen to Backup settings screen
- Confirm completion from Checklist
- Notification removal when a task is synced with Toodledo and the due date or time is changed
- Fix: default notification sound appears "Silent" instead of "Default"
- Translation updates

alpha 0.0.86 (06 Jul 2013)

- Trigger reminders from Tasker/Llama using the new category **"gtd.REMINDER"** (How-to)

- New home widget option to **always show task time**
- Hide **Goals archived** in Toodledo

Written by dgtale

Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

- Fix: Folders are not sorted in alphabetical order when the Toodledo sync option gets disabled

- Fix: Due date not shifted in Toodledo when "Floating" event is enable and "Optionally On" is disabled

- Fix: default "Hide until" value not set in new tasks using the "Quick-add" shortcut and "Share" functionality

- Fix: Samsung Multi window shrink/expand issue

alpha 0.0.85 (15 Jun 2013)

- New snooze option: 18 hrs
- Fix: Checklist items are now shared when a filter is active
- Fix: FC fix
- "Hide until using Time" setting moved to Settings > Experimental options. It doesn't update the task list as expected and it wont be fixed in the alpha version.
- Translation updates

alpha 0.0.84 (25 May 2013)

- New: added new task sorting mode (by title, by start date)
- New: Notebook can now be sorted
- New: "Star" parameter is now supported for Llama and Tasker task creation (How-to)
- Scrollable reminder dialog
- Fix: Misbehaving of "Confirm completion from reminder dialog" settings option
- Translation updates

alpha 0.0.83 (5 May 2013)

- Create a task from **Llama** and **Tasker** events. (How-to)
- DGT GTD **'Floating'** flag is mapped to Toodledo **'Optionally on'**; bear in mind that when a task is not completed at the specified date, DGT moves the floating event one day forward until you check it off, whereas Toodledo moves it to the next occurrence

- Backup to **external sdcard** (Utilities > Menu > Backup settings)
- Font size slightly increased on tablets
- New repeat option: **"Last day of every month"** (This feature is not supported by Toodledo and the repeat option will be changed to something like 'The last

Mon
of each month')

- Open Soft-Keyboard when "Quick-add" home widget is invoked
- When a checklist item is created, the hidden Priority is now set to 'None' by default
- Fix: checklist items filtered out from the home widget
- Translation updates

alpha 0.0.82 (27 March 2013)

- New Hotlist filter: show tasks if start date has already passed
- Fix: FC due to bad char in Danish translation
- Fix: Return call from reminder dialog fails when the number is not yet present in the phone book
- Fix: Goals "contribute to" attribute might create a recursive dependency
- Fix: Goals FC in rare cases
- Translation updates

alpha 0.0.81 (03 March 2013)

- New Hotlist filter option to show overdue tasks regardless of the active filter when the AND logical operation is active
- Fix: Hotlist filters (reported by many users)
- Fix: Hotlist filter combined with third party plugin (reported by Don)
- Small changes
- Translation updates

alpha 0.0.80 (24 February 2013)

- **FTP** Synchronization enabled (How-to setup)
- **Dropbox** Synchronization enabled (How-to setup)
- New **Llama** filter: use the new category **"gtd.launch.APP"** to launch DGT GTD automatically,   the old category
"gtd.APP"
will only activate the filter in DGT GTD (
 How-to
)

!!! You have to change the intent mode of all your actions from **"Start activity"** to **"Broadcast"** !!!
- Added support to **Tasker** (How-to)
- Changed the view a checklist/project is opened from the Widget, i.e. not the detail view, but the project list view
- Fix: wrong Hotlist count
- Fix: Hotlist (widget) with "Star" filter and checklist items
- Fix: the app doesn't handle recurring subtasks correctly when repeated with parent (reported by Sune)
- Fix: creating new notebooks within a folder, the relation to the folder is not set (reported by Aleksey)

Advice: install **Bluestacks** to use DGT GTD on your PC and sync the updated tasks with your devices (copy&paste from PC to DGT GTD is supported by Bluestacks)

alpha 0.0.79 (13 January 2013)

- New widget filters: Status, Goal (also configurable in Llama)
- New Llama filters: Folder, Goal (How-to)
- New menu option for checklist: "Clear all" items
- New alarm setting: Don't clear alarms (Alarm notifications don't get removed when the user tap the "Clear all" notification button)
- New task setting: default hide until for new tasks
- New tasklist setting: "Hide until" fine grained filter using due/start TIME (not only DATE)
- New setting for third party apps: Use "Hotlist" settings for Pure widget plugin
- Fix: Hotlist and Inbox counter (reported by Vinay)
- Fix: Filters in conjunction with 'Hide Subtasks' option enabled show wrong results due to wrong criteria for checklist items

alpha 0.0.78 (9 December 2012)

- Added support for **Samsung Note 2 Multi Window**
- Added support for **Llama**, read this How-to

- "Projects", "Checklists" and "Notebook" are available in the shortcuts creation screen
- New option menu in note editor to move the cursor to start/end of the text
- Minor changes
- Translation updates
- Fix: task title alignment in home widget (reported by Russ)
- Fix: Active alarms wrongly grouped when "sort by priority" is set in other lists (Reported by Vinay)

alpha 0.0.77 (25 November 2012)

- Sort by "Due Date" and "Priority" available in home screen widget and app task list
- Filters by Status, Context and Tags can be combined with "No Status", "No Context" and "No Tags". Eg: Filter by status where tasks have "No Status" OR "Active" status
- Fix: Length/Duration number wheels layout issues in Chinese
- Fix: quick-add closes the input text by pressing the return button (it should happen only when the task title is empty)

alpha 0.0.76 (18 November 2012)

- Bulk update: Hide until
- Automatic reminder for missed calls (new option under "Events settings")
- Capitalize first letter of any title word (new option under "General settings")
- Task list contextual menu: *Delete* and *Clone* option moved on top
- Task list contextual menu: added *Switch to project*
- Fix: Due dates not properly managed in Active alarms list, also grouping issues
- Fix: When you edit a task from the search result list and change it to a project then save it takes you now to the project's task list

alpha 0.0.75 (28 October 2012)

- Backup file encryption
- Automatic deletion of completed tasks after a defined period of time (new preference option)
- Translation updates
- Preparation for Dropbox Sync.
- Small UI changes
- Fix: FC by sharing "Recently added" and "Recently modified"

alpha 0.0.74 (14 October 2012)

1. Bulk update (move): remove tags
2. Bulk update (schedule): set/remove due time
3. Bulk update (schedule): duration/length
4. New "Hide until" options (1 month, 2 months, ...) like in Toodledo
5. Widget font size > 20
6. Task list "Sharing" feature makes use of the current filter, the "Hide until" and the "Hide completed" option
7. Shortcuts to notebooks (long-click on the notebook list)
8. Shortcuts to active alarms, recently created and recently modified
9. New preference option to force the automatic reminder when creating a new task from the Inbox list
10. When you edit a task from a reminder and change it to a project then save it takes you to the project's task list
11. Fix: alarm is not set when changed from the predefined options to "Date and Time..." (reported by Attila)
12. Fix: when first day of week is "Sunday" then the "day wheel" misbehaves (reported by Gerry)

alpha 0.0.73 (23 September 2012)

1. Daily backup schedule (Utilities > Menu > Backup Settings)
2. Removed "Hide subtasks" menu option from "Starred" and "Inbox" task lists
3. New tasks created from "Inbox" task list don't inherit active filter criteria any longer
4. Fix: Some bulk update operations don't mark tasks ready for synch, and don't change the parent projects due date (reported by Steve)
5. Fix: Delete on cascade confirmation message reports a wrong number of subtasks (reported by Mark)
6. Fix: New tasks created from the Goals view don't inherit the selected goal
7. Fix: Sometime the "contact" task title gets changed with messed up text (reported by Graham)

alpha 0.0.72 (9 September 2012)

1. Option for automatically moving checked off items to the bottom of the check list
2. Fix: Screen flickering on ICS and Jelly Bean

alpha 0.0.71 (25 August 2012)

1. Bulk update: assign priority, add tags
2. Filters are now applied also to "Active alarms", "Recently added" and "Recently modified" lists
3. Cancel the reminder notification from the notification bar when a task is deleted, completed or its due time is changed
4. Task title changes automatically according to the chosen "contact" task type
5. Minor changes
6. Translation updates

alpha 0.0.70fix3

1. fix: Folder list is not refreshed after a synchronization or restore
2. FC when filter is clicked in Notebook
3. Chinese translation fix (causing FC)

alpha 0.0.70

1. Backup to Dropbox
2. Preparation for Dropbox synchronization
3. Notebook filter (Menu option)
4. Long click on a list item (eg. a task, a project, a checklist) to create a shortcut on the home screen
5. Translation updates
6. Fix: "Hide until" not working properly in Hotlist when "Hide subtasks" is enabled (reported by lethargiclown)
7. Fix: when a Tag is renamed it's not propagated to Toodledo (reported by New Daddy)
8. Fix: Home widget icon alignment

alpha 0.0.69fix

1. Parent breadcrumb is visible in the reminder dialog
2. Fix: wrong status pre-set when Context filter is active

Written by dgtale
Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

alpha 0.0.69

   1. Option in filter screens to enable/disable multiple selection (Status, Context and Tag screens)
   2. Fix: Inheriting project attributes (reported by aslam)
   3. Fix: errors on some device model while synching

alpha 0.0.68

   1. New in home-widget: widget title
   2. New in home-widget: Star as filter criteria
   3. New option for deletion confirmation
   4. Contexts filter enhanced: multiple contexts can be provided as filter criteria
   5. Fix: Shortcuts inconsistent BACK button behavior (reported by xmas), you have to delete and create the shortcuts again

alpha 0.0.67fix

   1. force close when trying to open/add a note on tablets

alpha 0.0.67

   1. Hidden folders and goals can be filtered out from selection dialogs in the task detail and bulk update
   2. New option to enable/disable experimental support for basic HTML markers for task notes

   3. New option to enable/disable searching for completed tasks
   4. Translation updates
   5. Fix: attempt to fix the flickering issue

alpha 0.0.66

1. Notifications wake-screen (Settings>General>Alarm settings)
2. Support for basic HTML markers in Notes
3. Quick-add buttons in app are more responsive
4. Customizable background for task list home-widget
5. When you open the hotlist using the widget icon, Back will quit
6. Fix: (Bulk update) completed items became marked uncompleted by moving them to a checklist (reported by Marcus)
7. Fix: completion suggestions were hidden in landscape mode

alpha 0.0.65

1. New repeat option, e.g.: every 2nd Sunday every 2,3,4... months
2. Logical operator "AND/OR" for Hotlist filter criteria
3. New lists: active alarms, recently added, recently modified
4. Reduced min. font size in widget (from 14 to 12)
5. "Home" button always returns the user to the Home screen also when coming from shortcuts and home widgets
6. Restore file list is now sorted in descending order
7. Quick-add shortcut: the "+" button can be used to close the widget
8. Quick-add invocation by long pressing the device search button
9. Translation updates
10. Fix: recurring projects with subtasks get messed up in Toodledo after a couple of completions (reported by Tariq)
11. Fix: FC while completing recurring tasks "from completion"

alpha 0.0.64

1. Automatic backup purging (new option under Settings > General > Backup)
2. Automatic backup enabled for background synchronizations (Automatic Synch.)
3. Bulk update: move to checklist
4. Bulk update: move out of project/checklist
5. Bulk update: assign to status, context, goal
6. Insistent alarms (new option under Settings > General > Alarms)
7. Long-click related functionality on "Search" results list (Share, Clone, ...)
8. Fix: FC completing a task from search results when "Confirm completion from task list" is enabled
9. Fix: wrong filter applied in "No folder" task list
10. Translation updates

alpha 0.0.63

1. Fix: not scrollable Notebook folders
2. Fix: icons not properly refreshed in scrolling widget (reported by DISk)

alpha 0.0.62

1. Move to project/checklist dialog now shows the parent breadcrumb
2. New option for 3rd party widget provider: apply current filter (mreiner)
3. Minor changes and bug fix
4. Translation updates

alpha 0.0.61

1. Shortcut for quick-add task
2. New task type: return call, choose a missed call from call log
3. New option to show duration/length in task list
4. New options to confirm alarm dismissal and task completion
5. Swipe gesture detection improved for some device
6. Fix: Reminder at a specific time is not fired (reported by Maurizio)
7. Fix: alphabetical order based on localized preferences (i.e. current language's alphabet and conventions)
8. Fix: recurring tasks on weekends
9. Fix: search function now excludes deleted tasks (reported by sudhir)
10. Translation updates

alpha 0.0.60

1. SQL statement caching optimization
2. Bug fix (Goals: exclude it self from the "Contributes to" list

alpha 0.0.59

1. New: optional breadcrumb path visible in task detail and tasklist
2. New: optional navigation bar in task detail screen to browse tasks of list
3. New: task list group headers ("7-14 days", "15-30 days")
4. Task length/duration part 2: editing enabled
5. Goals part 2: edit "period of time" and "contributes to"
6. Scrollable and resizable home widget 2x1 with big and small icons (for Honeycomb and ICS)
7. Translation updates
8. Bug fix

alpha 0.0.58

1. New: Scrollable and resizable home widget for Android 3.x and 4 (Honeycomb and ICS)
2. New: Task length/duration (part 1: read-only mode)
3. New: Goals (part 1: basic functionality)
4. "Hide completed tasks" switch available in task list menu
5. The "Folder" word replaces "List" to identify user created folders (like in Toodledo)
6. Folders view moved to the left of the dashboard (slide from left to right)
7. New lists on dashboard (goals list placed to right screen)
8. Reduced memory usage during backup/restore (added JSON indentation)
9. Option to synch completed tasks at first synch or by merging
10. Next occurrence for recurring tasks "from due date" slightly changed, now it can occur in the past
11. Czech, French, German, Hungarian, Italian, Korean, Portuguese and Russian translation updates
12. Bug fix

alpha 0.0.57

1. Bulk update (Part 3: Move to list, move to project)
2. New task list option: "Show status"
3. Timestamp button is now available in note editing
4. Horizontal page control visible in the header
5. Italian translation updates
6. Fix: Repeating task "With Parent" not properly handled after task completion (reported by Steve)
7. Fix: Repeating task deletes additional notes when the task is marked completed (Reported by Brandon)

alpha 0.0.56

1. Fix: Tablet FC by opening the notebook

alpha 0.0.55

1. Bulk update (Part 2: star)
2. Tasks created in a project inherit list, context and tags from the project (new task setting options enabled by default).   Tasks moved into a project are not yet managed with this option
3. Option to see exact time in task list (enabled by default)
4. Home widget: text alignment if the due date is not set (widget option)
5. Bug fix

alpha 0.0.54

1. Share lists and projects/checklists with subitems
2. Fix: Repeat with parent was disappeared from the options (reported by Steve)
3. Fix: Floating tasks are moved forwards overnight but they are not flagged to be propagated to Toodledo
4. Fix: Bulk schedule sets the due time to 0:00 when task has a due time set (reported by Reiner)

alpha 0.0.53

1. Bulk update (Part 1: schedule, delete)
2. Task titles no longer truncated in task detail and task list
3. Reset Help notifications (Generic Preference)

alpha 0.0.52

Written by dgtale
Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

1. Resizable font size for home widgets
2. Added "Switch to Checklist" option in "Move to Checklist" dialog
3. LED notification color preference
4. Small changes to Dark theme
5. Fix: Soft-keyboard in landscape mode (reported by Nicholas)
6. Fix: Priority sorting (reported by Artyom), tasks are now sorted by Due date > Next Action > Priority > Star > Status

alpha 0.0.51
 Merry Christmas and Happy New Year!

1. Dark theme
2. Fixed: FC on tablets in landscape mode

alpha 0.0.50

1. Home screen shortcuts to lists (folders)
2. Fixed: FC on small tablets in landscape mode

alpha 0.0.49

1. Confirm message losing Notebook changes on tablet
2. Notebook sharing
3. Fixed: FC after sync. on some devices (error: SQLiteDatabase.dbopen())

alpha 0.0.48

1. Notebook (synchronization with Toodledo included in DGT GTD Toodledo plugin)
2. "Automatic backup before sync" option moved from Preferences to Utility view
3. Option to dial directly from notification dialog

alpha 0.0.47

1. Advanced repeating options ([Wiki page: see Format 1, 2 and 3](#))
2. Use Toodledo "Hide Future Tasks" option to set DGT GTD "Hide until" on each changed task

alpha 0.0.46

(Last manual and automatic time stamps disappear after this installation, they will appear again after the next manual or automatic synch.)

1. Widget 4x3
2. Disable vibrate and sound for notifications when you are in a call (READ_PHONE_STATE permission required)
3. Added Swedish language (thanks to David J. and Janne E.)
4. Added Polish language (thanks to Kamil)
5. Fix in Hotlist: projects without a due date were listed even if "hide subtasks" was turned off (reported by xoyk)
6. Fix in repeating checklist when all the items are checked off (reported by Jane)
7. Fix in hide until: it only works the second time (reported by heechee)

alpha 0.0.45

1. "Floating flag" and "Hide until" are saved in Toodledo; two devices can sync having Floating/Hide data updated even if they are not supported by Toodledo
2. Fix: defect in "Hide task until" in combination with "Repeat" options after task completion (reported by leo_t)

alpha 0.0.44

1. new Repeat option: business days
2. "Hide task until" now supports "from start date"
3. Translations fix

alpha 0.0.43fix

1. FC fixed
2. Task title supports auto-link on phone numbers (only in task detail view)
3. Last Manual sync and last auto sync date have different labels

alpha 0.0.43

1. Hide task until a defined date (available in task detail, menu option available in task list)
2. Force ignore alarms (useful if DGT GTD is installed on several devices sharing the same task list)
3. Swipe the task detail view to flip between task views (not available in checklist item view)
4. Option for alarm to vibrate only when in silent mode instead of always or never
5. Move item out of checklist, move to other checklists/projects is now possible
6. Fix: deleting checklist item from detail view is now active
7. Fix: translations
8. Added French language (thanks to jean-claude)
9. Added Hungarian language (thanks to Adam)

alpha 0.0.42

1. German translation improvements (thanks to Michael and Robert)
2. Added Spanish language (thanks to miguelns)
3. Added Danish language (thanks to Frank H.)
4. Added Italian language (thanks to Stefano F.)

alpha 0.0.41

1. Minor changes
2. Added German language (thanks to Michael H.)
3. Fix: after a Tag deletion, the tag flag was still visible in the task list

alpha 0.0.40fix2

1. Nagging alarm bug fixed

DGT GTD Changelog

Written by dgtale
Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

alpha 0.0.40

1. Language selection option
2. Improved reminders for this idea
3. Repeating tasks adjust start date
4. Home widget: added folder, context and tag filters
5. Tag filter options: added AND-OR operators

alpha 0.0.39

Will you please verify your preferences after installation, they might have been reset to default.

1. Pure Widget integration through DGT GTD Pure plugin
2. Hotlist preferences: set your preferred filter values (priority, days, star, **next action**)
3. Home widget: added 'quick add' icon
4. Home widget: added preference to use the new "Hot list" settings
5. Quick access to calendar tapping the date in task list; added 'immediate save' option in Date settings (Reiner B. idea)
6. Re-enabled the 'immediate refresh' option in task list; fixed the bug that forced me to disable this option
7. Enabled Starred & Note field for items in Check List (alix idea)
8. No longer retype your search criteria, search results view remains available if you choose the wrong task and press 'back'(Reiner B. idea)
9. Added option to activate "Start date & time"
10. Added new repeat option: "with parent"
11. Enabled functionality to repeat "from due date" and "from completion date"
12. Checked off items in repeating check list are now repeated (reported by Richard K.)
13. Added Korean language (thanks to sabug)
14. Added Czech language (thanks to Pavel V.)
15. Added Portuguese Brazil language (thanks to Polis)
16. Added Russian language (thanks to Pavel S.)
17. Fix: during a quick-task creation the task title is now kept while rotating the screen
18. Fix: by deleting a subtask the project due date is now updated and displayed correctly in task list (reported by Maurizio B.)
19. Fix: FC when trying to access reminder's date & time picker
20. Fix: scheduled alarms (for reminders with date & time) are not removed after reminder removal (reported by Bryan C.)

DGT GTD Changelog

Written by dgtale

Saturday, 15 February 2014 00:00 - Last Updated Saturday, 06 December 2014 12:08

---

alpha 0.0.38

1. Home widget: display tasks without a due date
2. Home widget: color preferences for dates and for "next action" task title
3. Floating tasks fix: alarm not triggered after resetting for the next day (thanks Doug for reporting this issue)

alpha 0.0.37

1. Improved home widget responsiveness

alpha 0.0.36fix

1. App Widget fix, Task Killer apps which people use might be killing the widget update service
2. If FC persists, do a backup, uninstall, install again and don't force-move to sdcard!
3. Warning for Toodledo users: please read this

alpha 0.0.36

1. App Widget 4x1, 4x2, 4x4 (scrolling not yet available)
2. Auto due date in hotlist reactivated, added new option to disable it
3. minor changes/improvements
4. FC fixed exiting from a checklist opened by the reminder notification dialog

alpha 0.0.35/fix

1. Tasks due today (without a due time) are no longer considered in the overdue count (date s set with earlier versions might be still considered by the overdue counter until you change it using the new version)

---

2. FC fixed exiting from a checklist opened by the reminder notification dialog

alpha 0.0.34

1. Floating task: long press on "Due date" to enable/disable floating task feature (reboot after installation required)

2. Recurring tasks: [reworked] once marked completed the due-date is moved forward by the specified time (and a copy of the task is marked as completed)
3. Recurring tasks: "Repeat" no longer subordinated to due-date & remind
4. Reminders: can be set to a specific date and time
5. Hotlist: when a new task is created in hotlist, the due-date is no longer set automatically
6. Vibrate option
7. Optional nagging alarms remind you again if you don't hear the sound or feel the vibration

8. fix: FC when pressing back in a check list after having toggled from Project to Check list
9. fix: 6 and 12 hrs reminders were displayed as "None"
10. fix: children counter increased after each restore
11. fix: widget icon opens the last view escaped using the "Home" device-btn
12. fix: snooze time list for reminders

alpha 0.0.33

1. bug fix: last sync date not updated immediately after sync
2. bug fix: FC pressing back in task info view (only in case of new tasks)

alpha 0.0.31

1. New task types: Call, Email, SMS (basic functionality)
2. Task properties/info view (new menu item in task detail)
3. "Hide subtask" reworked for custom lists
4. Priority default set to "Low" instead of "negative"
5. bug fix in drag&drop: sometime the item changes the name while moving

alpha 0.0.30

1. Re-order checklist items (drag&drop)
2. Installation allowed only on device to prevent performance issues and sync inconsistencies
3. Small bug fix
4. "Full Synchronization" temporarily removed

alpha 0.0.29

1. Auto Sync. configurable interval
2. Full Synchronization

alpha 0.0.28

1. Inbox rules changed
